Doctor's word.

Or

The Refugee.

3. Read the passage carefully and answer the questions given below : 20

In 1897 at the age of forty, Ross made one of the greatest of medical discoveries. He proved that malaria was transmitted by mosquitoes, showed how the transmission occurred and identified the particular type of mosquito which was responsible. This discovery not only brought one of the most harmful diseases within control but also helped to show how other insect borne, diseases, such as yellow fever, sleeping sickness, typhus and plague might be prevented.

Questions :

- (i) Who made one of the greatest medical discoveries ?
- (ii) What did he prove ?
- (iii) What did he identify ?
- (iv) Name the other insect-borne diseases.
- (v) Give the suitable title to the above passage.
